

PROEFFICIENCY PROJECT PROEFFICIENT COLD&LIGHTING PRODUCTS

PRO-EFFICIENT COLD & LIGHTING PRODUCTS' overall aim is to promote voluntary initiatives for the most eco-energy efficient products.

The activities are focused in the residential and tertiary sectors of Spain, Germany, Austria, Poland, Romania and United Kingdom

- Involving of promoters and consumers to implement voluntary pilot project together about eco-energy-efficient COLD & LIGHTING products.
- Integration of experiences and transferred knowledge between EU organizations.
- It is expected that 100 European organizations will join the project
- Energy saving in lighting will be 2.000 MWh/year that substitute 580 toe and should avoid 3350 tn CO₂ per year.
- Cold appliances initiatives will achieve similar energy savings.
