

ENERGY SAVING SOLUTIONS FOR YOUR BUSINESS

Severn Wye Energy Agency can help your business to reduce fuel bills, attract new customers and improve your work place environment.

Severn Wye has supported over 250 businesses within a variety of industry sectors - from industrial and manufacturing facilities through to offices, hospitality businesses, retail outlets and car dealerships.

Through a combination of a detailed energy survey and on-going support we have identified average annual cost savings of approximately 30% through the implementation of no cost and low cost measures.

Your business can become more efficient and start making cost savings straight away.

“Thanks to the energy survey from Severn Wye Energy Agency we have made considerable savings and improved our business efficiency. I don't know why more small businesses don't take advantage of such a great service.”

*Alex Heslop, Proprietor,
Bentleys Bar and Kitchen*

Severn Wye offer...

- **Analysis of fuel bills to identify trends, anomalies and assess tariffs and charges**
- **Up to 3 hrs on-site gathering data and identifying opportunities for savings**
- **A full written energy survey report including assessment of:**
 - Heating/plant room for age & efficiency of boilers
 - Time, temperature and zoning control of heating systems
 - Insulation levels of walls, ceilings, pipe work and any rooms with a constant temperature requirement
 - Lighting opportunities from both a technical (efficient lighting and control) and user perspective
 - Electrical equipment - from that found in a standard office, to technical process machinery
 - Renewable energy revenue generation opportunities from the recently announced Feed-In Tariff and the Renewable Heat Incentive

- **A face to face presentation of findings and recommendations**
- **A bespoke 'action plan' with measures grouped into no, low and capital cost**
- **Follow up support through the installation and commissioning of measures**

What are the benefits?

This is an opportunity to receive independent, impartial and technology neutral advice, we will recommend the solution that is best for your business and we guarantee - no product selling!

From the billing data analysis and on-site survey we aim to identify a minimum of 15% savings from no and low cost

energy efficiency measures - see our promise to you.

Severn Wye's energy efficiency experts will support you in finding accredited local installers, obtaining and assessing quotes and getting the identified measures installed.

Our promise to you...

If we are not able to make realistic suggestions that can achieve at least 15% savings against your current consumption then you will not be charged for the survey.

Costs & commitments

The cost of the service is 2.5% of your organisations annual energy spend and so will vary from business to business. However, if your energy costs are less than £20,000 per annum the service will cost £500+vat.

For example - a business spending £20,000 per annum on energy engages our services at a cost of £500+vat. This would typically return a minimum saving of £3,000+ through the implementation of no and low cost measures.

Severn Wye Energy Agency also offer tailored sustainable energy advice and support to a wide range of clients including householders, community buildings, schools, local authorities, parish councils, community renewable energy schemes, landowners, farmers and churches.
